

Activity 3 - List

The HTML that follows is for a simple list. Insert it into a properly formed HTML file and format it. Try to ensure the following are done

- space the list items at least 20 pixels from the left edge of the page
- space the list items at least 10 pixels from each other
- center the header
- keep the list at least 50 pixels from the header
- the book titles in the list should not be displayed in a serif font
- the header should use a different font than the list
- the text of header should be dark red
- break the CSS rules into two different .css files. One file should contain any spacing rules, the other any rules governing font faces or coloring. Bind both into your HTML document

You can [directly download](#) (zip file) this as an [Intel XDK](#) project. The file to edit is **www/index.html**

NOTE: This activity is best conducted in the XDK (or in CodePen), **not in the discussion forum** below. The discussion forum includes its own stylesheet which may override the styles you want to experiment with.

```
<h1>Books</h1>
<ol>
  <li>A la Recherche de Temps Perdu</li>
  <li>Middlemarch</li>
  <li>Ulysses</li>
  <li>Don Quixote</li>
  <li>Moby Dick</li>
  <li>Hamlet</li>
  <li>War and Peace</li>
```
