Intel XDK activity

Use CSS on the following HTML. Try various styles, experiment, and have fun. We have a live coding demonstration working with the same source.

This can also be downloaded directly (zip file) as an Intel XDK project.
The **www/index.html** is the file we are editing.

NOTE: *This activity is best conducted in the XDK (or in CodePen),* **not in the discussion forum** *below. The discussion forum includes its own stylesheet which may override the styles you want to experiment with.*

```
      <!DOCTYPE html>

      <html>
        <head>
          <title>On the Inventor of Gunpowder</title>
          <style>
          /* CSS */
10.       </style>
        </head>

        <body>
          <h1>On the Inventor of Gunpowder.</h1>

          <address rel="author">By John Milton</address>

20.       <p>Praise in old time the sage Prometheus won,<br>
          Who stole ethereal radiance from the sun;<br>
          But greater he, whose bold invention strove<br>
          To emulate the fiery bolts of Jove.</p>

        </body>
      </html>
